Managed Firewall

### Ultimate Threat Management for your Network Security

Firewall Management:
Provides availability, backups, and updates

› Firmware updates

› Automatic backup of content configuration

› Hardware Replacement

› IP Address Management

› End User Control

› Configuration Management

Virtual Private Network:
Secure communication to your network from remote offices, branches, and work-from-home employees

› Secure Socket Layer (SSL) and IPsec - mobile users can securely access data via laptop, tablet or smartphone, using SSL encryption

› Site-to-Site VPN - securely connect your branch offices or other remote locations

› User management and setup

Anti-Virus & Anti-Malware:
Provides protection against virus, spyware, worms, & other forms of malware

› Real-time network scanning

› Spyware/Anti-Virus Protection for remote users

› Daily malware signatures

› Find threats hidden within legitimate content, includes infected file quarantine or isolation of virus sender

Intrusion Prevention & Detection System:
Protection against network-level threats

› Examines traffic payload to ensure there is no hidden malicious content

› Actively blocks known threats & protects end users

› Continuous monitoring of firewall logs for suspicious activity as well as signs of intrusion

› Front end protection of network infrastructure

Web Content Filtering:
Greater security and increased visibility

› Block access to harmful, inappropriate, and dangerous websites - sites which may contain phishing attacks, malware such as spyware, or offensive content that can expose organizations to liability

› Customize allow/deny access by category (porn, criminal activity, hate) and location

Application Control:
Proactive enforcement of company-defined policies helps to protect valuable network resources

› Block or allow with precision

› Bandwidth management

› Block functions within applications oso your network is not compromised by multifaceted attacks

› Enforce web app blocking (Ex. Facebook, Youtube, Pinterest, etc.)
